

Objective

To achieve an internship at an innovative company in the field of computer science.

Education

University of North Florida
Degree: B.S. Computing and Information Sciences
Degree Concentration: Computer Science
GPA: 3.96

Expected Graduation: December 2018

Relevant Coursework

Computer Science 1 and 2
Computational Structures
Data Structures
Computability and Automata
Intro to Computer Hardware
Introduction to Cyber Security

Computer Networks and Distributive Processing
Intro to Systems Software
Development of Gaming and Mobile Applications
Network Security and Management
Computer Cryptography

Technical Skills

Programming Languages: Java, C, HTML, CSS, JavaScript, TypeScript, Python, C#, and Swift
Developer Tools: Github, Eclipse, jGRASP, Xcode, Android Studio, Sublime Text, Visual Studio
Miscellaneous: Ubuntu Linux, IPTables, AngularJS, Ionic, Raspberry Pi, MariaDB, Django Framework

Projects

UNF Surf

-A mobile application built with the Ionic 2 framework, written in HTML, SCSS, and Angular 2 JavaScript. This app is a medium for the UNF Surf team to host announcements to their audience, offer promotional deals from sponsors, host a calendar of events and contests, and profiles for the competitive team.

SMIRK

-SMIRK (Secure Medical Information Repository Kit) is an application made with three other peers to compete in the University of Connecticut's CyberSEED 2017 cyber security coding competition. This application was written in Python, and uses Django and MariaDB. SMIRK is to be used as a medium for record creation and upkeep in a hospital setting, where authenticated users are assigned a specific role (i.e. Doctor, Patient, Medical Administrator, etc.). With each role, a list of permissions is available to the user (i.e. view patients' information, create a certain type of record, view specific records, etc.).

Personal Website (tylercoverstone.github.io)

-Website built with HTML, CSS and AngularJs. Hosted on Github repository. Contains a more in-depth list of projects, technical skills, and personal information. Source code for specific projects that are listed on the website can be found on Github account.

Employment

Fitness Trainer at University of North Florida's Student Wellness Complex	2017 - Present
Sales Employee at Melbourne Beach Fitness	2014 - 2016
Private Landscaping	2013 - 2014
City of Melbourne Lifeguard	2012 - 2014

Extracurricular

-Member of University of North Florida Association of Information Technology Professionals (AITP)
